## Figures

B1	Strength of the class cleavage in Switzerland, 1971–2003	21
B2	Strength of the religious cleavage in Switzerland, with and without controlling for structural change, 1971–2003	21
B3	Strength of the class cleavage in Switzerland, with and without controlling for structural change, 1971–2003	22
B4	Percentage of party identifiers in Germany voting for ‘their’ party, 1972–2002	22
B5	Proportion of split-ticket voters in Germany, 1969–2002	40
B6	Proportion of split-ticket voters in Switzerland, 1971–2003	40

## Tables

B1	Vote of routine nonmanual and service class employees in Germany, by sector of employment, 1976–2002	6
B2	Voting behaviour of the new middle class in Switzerland, by employment sector, 1995–2003	7
B3	Effect of social-structural characteristics on voting choices in Germany, 1969–2002	8
B4	Effect of social-structural characteristics on voting choices in Switzerland, model 1, 1971–2003	10
B5	Effect of social-structural characteristics on voting choices in Switzerland, model 2, 1971–2003	13
B6	Effect of social-structural characteristics on voting choices in Switzerland, model 3, 1971–2003	16
B7	Effect of social-structural characteristics on voting choices in Switzerland, model 4, 1975–2003	19
B8	Effect of social-structural predispositions on voting choices in Germany, 1972	23
B9	Effect of social-structural predispositions on voting choices in Germany, 1976	23
B10	Effect of social-structural predispositions on voting choices in Germany, 1980	24
B11	Effect of social-structural predispositions on voting choices in Germany, 1983	25
B12	Effect of social-structural predispositions on voting choices in Germany, 1987	26
B13	Effect of social-structural predispositions on voting choices in Germany, 1990	27
B14	Effect of social-structural predispositions on voting choices in Germany, 1994	28
B15	Effect of social-structural predispositions on voting choices in Germany, 1998	29
B16	Effect of social-structural predispositions on voting choices in Germany, 2002	30
B17	Effect of social-structural predispositions on voting choices in Switzerland, 1971	31
B18	Effect of social-structural predispositions on voting choices in Switzerland, 1975	32
B19	Effect of social-structural predispositions on voting choices in Switzerland, 1979	33
B20	Effect of social-structural predispositions on voting choices in Switzerland, 1987	34
B21	Effect of social-structural predispositions on voting choices in Switzerland, 1991	35
B22	Effect of social-structural predispositions on voting choices in Switzerland, 1995	36
B23	Effect of social-structural predispositions on voting choices in Switzerland, 1999 postelectoral survey	37
B24	Effect of social-structural predispositions on voting choices in Switzerland, 1999 panel survey	38

B25	Effect of social-structural predispositions on voting choices in Switzerland, 2003	39
B26	Descriptive statistics for the baseline model of voting choice in Germany, 1972–1990	41
B27	Descriptive statistics for the baseline model of voting choice in Switzerland, 1999	42
B28	Stability of evaluations of the economic situation by level of predisposition strength in Germany, 1972–1990	42
B29	Stability of the sympathy for the CDU candidate by level of predisposition strength in Germany, 1972–1990	42
B30	Stability of the sympathy for the SPD candidate by level of predisposition strength in Germany, 1972–1990	42
B31	Stability of issue positions by level of predisposition strength in Switzerland, 1999	42
B32	Stability of politicians’ evaluations by level of predisposition strength in Switzerland, 1999	43
B33	Effect of political sophistication and of the Index of Predisposition Strength on the stability of left-right positions in Germany, first to second panel wave, 1976–1990	43
B34	Effect of political sophistication and of the Index of Predisposition Strength on the stability of the sympathy for the SPD candidate in Germany, first to second panel wave, 1972–1990	43
B35	Effect of political sophistication and of the Index of Predisposition Strength on the stability of the evaluation of the government’s performance in Germany, first to second panel wave, 1972–1990	44
B36	Effect of political sophistication and of the Index of Predisposition Strength on the stability of the evaluation of the economic situation in Germany, first to second panel wave, 1972–1990	44
B37	Effect of political sophistication and of the Index of Predisposition Strength on the stability of the evaluation of the economic situation in Germany, second to third panel wave, 1972–1990	45
B38	Effect of political sophistication and of the Index of Predisposition Strength on the stability of the sympathy for the CDU candidate in Germany, first to second panel wave, 1972–1990	45
B39	Effect of political sophistication and of the Index of Predisposition Strength on the stability of the sympathy for the CDU candidate in Germany, second to third panel wave, 1972–1990	46
B40	Effect of political sophistication and of the Index of Predisposition Strength on the stability of issue positions in Switzerland, first to second panel wave, 1999	47
B41	Effect of political sophistication and of the Index of Predisposition Strength on the stability of issue positions in Switzerland, second to third panel wave, 1999	48

B42	Effect of political sophistication and of the Index of Predisposition Strength on the stability of the sympathies for politicians in Switzerland, first to second panel wave, 1999	49
B43	Effect of political sophistication and of the Index of Predisposition Strength on the stability of the sympathies for politicians in Switzerland, second to third panel wave, 1999	49
B44	Effect of precampaign attitudes and of attitude changes on voters' choices among political novices in Switzerland, 1999	50
B45	Effect of precampaign attitudes and of attitude changes on voters' choices among political experts in Switzerland, 1999	51
B46	Effect of respondents' attitudes on voting intentions or choices in Germany, 1972	52
B47	Effect of respondents' attitudes on voting intentions or choices in Germany, 1976	52
B48	Effect of respondents' attitudes on voting intentions or choices in Germany, 1983	53
B49	Effect of respondents' attitudes on voting intentions or choices in Germany, 1987	53
B50	Effect of respondents' attitudes on voting intentions or choices in Germany, 1990	54
B51	Effect of respondents' attitudes on voting intentions in Switzerland, first wave, 1999	54
B52	Effect of respondents' attitudes on voting intentions in Switzerland, second wave, 1999	55
B53	Effect of respondents' attitudes on voting choices in Switzerland, third wave, 1999	55
B54	Construction of the class schema, 1988 ISCO codes	57
B55	Construction of the class schema, 1968 ISCO codes	59
B56	Construction of the class schema, Switzerland, 1971, 1979, 1987, and 1991	61
B57	Construction of the class schema, Germany	62
B58	Coding of voters' educational level, Switzerland	63
B59	Coding of voters' educational level, Germany	64

## Additional statistical results

Table B1: Vote of routine nonmanual and service class employees in Germany, by sector of employment, 1976–2002

Routine nonmanual employees						
	CDU/CSU		SPD		<i>N</i>	
	Private	Public	Private	Public	Private	Public
1976	32.7	44.0	55.8	52.0	52	25
1983	36.5	33.3	45.9	38.9	74	18
1990	42.4	54.1	44.6	35.1	92	37
1994	30.3	12.5	60.6	37.5	33	8
1998	25.8	23.1	68.2	61.5	66	13
2002	32.8	33.3	52.5	58.3	61	12

Service class						
	CDU/CSU		SPD		<i>N</i>	
	Private	Public	Private	Public	Private	Public
1976	38.9	35.7	46.3	51.0	95	98
1983	45.5	27.6	43.2	51.7	88	58
1990	53.8	37.5	31.9	42.4	119	144
1994	32.4	31.6	36.5	42.1	74	57
1998	31.9	29.5	48.3	39.6	263	139
2002	50.6	41.2	31.3	41.2	259	119

Note: the shares of vote and the number of cases are based on all voters, not only on the supporters of the SPD and CDU/CSU.

## **Operationalization**

### *Measuring social class*

The logic underlying the construction of our class schema was presented in chapter four. When we have sufficient data, we construct a modified version of the Goldthorpe schema, by separating the service class into three groups. This, however, is only possible in four Swiss elections (1975, 1995, 1999, and 2003). This class schema is based on ISCO codes, and uses also information on voters' employment status. The construction of this detailed class schema is documented in tables B54 (1988 ISCO codes) and B55 (1968 ISCO codes). In the remaining surveys (1971, 1979, 1987, and 1991 in Switzerland, as well as all German surveys), we use a simpler class schema, where only six categories are distinguished. The construction of this variable is detailed in tables B56 (Switzerland) and B57 (Germany).

Table B54: Construction of the class schema, 1988 ISCO codes

	Employees	Senior employees	Self-employed

	1969–1987, 1998, 2002	1990	1994
Unskilled workers	Angeleitete Arbeiter, ungelernete Arbeiter, landwirtschaftliche Arbeiter	Angeleitete Arbeiter, ungelernete Arbeiter, Landarbeiter	Angeleitete/ungelernte Arbeiter
Skilled workers	Facharbeiter, sehr qualifizierte Facharbeiter	Facharbeiter	Industrie- und Werkmeister im Angestelltenverhältnis, gelernte und Facharbeiter, Vorarbeiter und Kolonnenführer/Brigadier, Meister/Poliere
Routine nonmanual employees	Ausführende Angestellte, einfache Angestellte, Beamte des einfachen Dienstes	Angestellte mit einfacher Tätigkeit, Beamte im einfachen Dienst, Mannschaftsdienstgrad, Unteroffiziere	Beamte im einfachen Dienst; Angestellte mit einfacher Tätigkeit;
Service class	Qualifizierte Angestellte, Leitende Angestellte, mittlere Angestellte, wissenschaftliche Angestellte, Beamte des mittleren Dienstes, Beamte des gehobenen Dienstes, Beamte des höheren Dienstes	Angestellte mit gehobener Tätigkeit, Angestellte mit leitender Tätigkeit, Beamte im mittleren Dienst, Beamte im gehobenen Dienst, Beamte im höheren Dienst, Richter, Offiziere	Beamte im mittleren Dienst; Beamte im gehobenen Dienst; Beamte im höheren Dienst; Angestellte, die schwierige Aufgaben nach allgemeiner Anweisung selbständig erledigen; Angestellte, die selbständig Leistungen in verantwortungsvoller Tätigkeit erbringen oder begrenzte Verantwortung für die Tätigkeit anderer übernehmen; Angestellte mit umfassenden Führungsaufgaben und Entscheidungsbefugnissen
Self-employed	Freie Berufe, selbständige Akademiker, kleinere Selbständige, grössere Selbständige, mittlere Selbständige, Inhaber Grossunternehmen	Selbständige	Akademische freie Berufe, Selbständige
Farmers	Kleine Landwirte, mittlere Landwirte, grosse Landwirte	Selbständige Landwirte	Selbständige in Landwirtschaft

## Education

In Switzerland, the educational categories used in the different original surveys varied substantially. At one extreme, in the 1999 and 2003 studies, 13 different education levels were distinguished. By contrast, only five answer categories were proposed in 1987 or 1991. In order to get a single variable for all datasets, we distinguish only three levels of education. The middle category corresponds to a vocational education, and the other categories comprise all respondents with a lower or a higher education, respectively. Table B58 indicates for each survey how the original answer categories were recoded.

In Germany, educational categories were more homogeneous. A five-category variable can be constructed for all surveys, with the following groups: *Volks/Hauptschule ohne Lehre*, *Volks/Hauptschule mit Lehre*, *Mittlere Reife*, *Abitur*, *Abgeschlossenes Studium*. The operationalization of the variable is detailed in table B59.

**Table B58: Coding of voters' educational level, Switzerland**

	Education level		
	Low	Middle	High
1971	école primaire	secondaire inférieur	secondaire, sans maturité; université, sans licence; université, avec licence
1975	sans scolarité; primaire, non terminé; primaire	apprentissage; secondaire inférieur	secondaire, sans maturité; école technique; maturité; école normale; université, sans licence; université, avec licence

### *Classification of Swiss political parties*

When we analyze respondents' votes in Switzerland, we usually consider four groups of parties. The composition of these groups is indicated below (for the parties represented in both the German and French linguistic regions, we indicate both corresponding names.

Otherwise, only the original party name is listed):

- Left: Sozialdemokratische Partei/Parti Socialiste (SP/PS), Grüne Partei/Parti Ecologiste (GPS/PES), Partei der Arbeit/Parti du Travail (PdA/PdT), Solidarités/Alliance de Gauche (AdG), Alternative Liste/Linkes Bündnis, Basta, Bunte Liste, Combat socialiste, Demokratisches Nidwalden, Die andere Schweiz/Alternative socialiste verte (DAS/ASV), Frauen macht Politik (Frap!), Freie Umweltliste, Glarner Umweltgruppen, Grünes Bündnis (GBS, former Grüne Alternative Schweiz), Grüne-freie Liste, Kritisches Forum, La Verda, Les VertEs et Solidarités, Mouvement écologiste, Ökoliberale Bewegung, Parti Libéral-Social, Parti Socialiste Autonome (PSA), Partito socialista unitario (PSU), Progressive Organisationen der Schweiz (POCH), Renaissance Suisse-Europe, Sozialistisch Grüne Alternative Zug (SGA), Verts alternatifs.
- Center: Christlichdemokratische Volkspartei/Parti Démocrate-Chrétien (CVP/PDC), Christlichsoziale Partei/Parti Chrétien-Social (CSP/PCS), Evangelische Volkspartei/Parti Evangélique Populaire (EVP/PEV), Landesring der Unabhängigen/Alliance des Indépendants (LdU/AdI), Parti Indépendant Chrétien-Social (PICS).
- Liberal Right: Freisinnig-Demokratische Partei/ Parti radical-démocratique (FDP/PRD), Liberale Partei/Parti libéral (LPS/PLS).
- Conservative Right: Schweizerische Volkspartei/Union démocratique du centre (SVP/UDC), Eidgenössisch-Demokratische Union/Union Démocratique Fédérale (EDU/UDF), Freiheitspartei/Parti de la Liberté (FPS/PdL former Autopartei/Parti des Automobilistes), Lega dei Ticinesi, Republikanische Bewegung/Mouvement républicain (Rep.), Schweizer Demokraten/Démocrates Suisses (SD/DS, former Nationale Aktion/Action nationale), Vigilance.
